

IN THE CLAIMS

Please cancel claims 11-29 without prejudice and add new claims as follows:

1-29. (Canceled).

30. (New) A method of treating fatty deposits and cellulite of a person, comprising:
determining the presence of dimpled skin of the person; and
contacting the skin with a composition comprising:
at least about 2 weight percent of at least one of:
(a) at least one conjugated linoleic acid as a free acid or a
combination of conjugated linoleic acids, each of the conjugated linoleic acids of the
combination being a free acid, (b) at least one salt of at least one conjugated linoleic acid, the
salt comprising at least one an alkaline metal, an alkaline earth, ammonia,
monoethanolamine, diethanolamine, and triethanolamine, and (c) a combination of (a) and
(b).
31. (New) The method of claim 30, wherein the composition comprises from 2 to 70% by
weight of (a), (b), or (c).
32. (New) The method of claim 31, wherein the composition comprises a member
selected from the group consisting of cis- and trans- isomers of 9,11-; 10,12-; and
11,13-octadecadienoic acid, and phospholipid, mono-, di- and tri-glycerides, ethers, esters,
and salts thereof.
33. (New) The method of claim 30, wherein the composition is at least one of a cream, a
gel, a lotion, an oil, and a spray.
34. (New) The method of claim 30, wherein the composition comprises anti-cellulite
agents.
35. (New) The method of claim 34, wherein the anti-cellulite agent is a xanthine.

36. (New) The method of claim 34, wherein the anti-cellulite agent is selected from the group consisting of caffeine, theophylline, theobromine, aminophylline and a combination thereof.

37. (New) The method of claim 30, wherein the composition further comprises a vanadium compound.

38. (New) The method of claim 30, wherein the step of determining the presence of at least one of fatty deposits and cellulite comprises determining the presence of dimpled skin.
